

spark is Athena's multi-featured platform for New Hedge Funds

spark meets the current and emerging DDQ requirements needed to compete for assets with more established funds

Key Features

Cost Our pricing model is tied to a fund's AUM so that it will be initially affordable to a launch.

Implementation By limiting the number of external connections to pre-certified counterparties, we can greatly reduce the on-boarding time.

Market, Pricing and Security Data EOD Pricing Data, Security Data, Market Data integration.

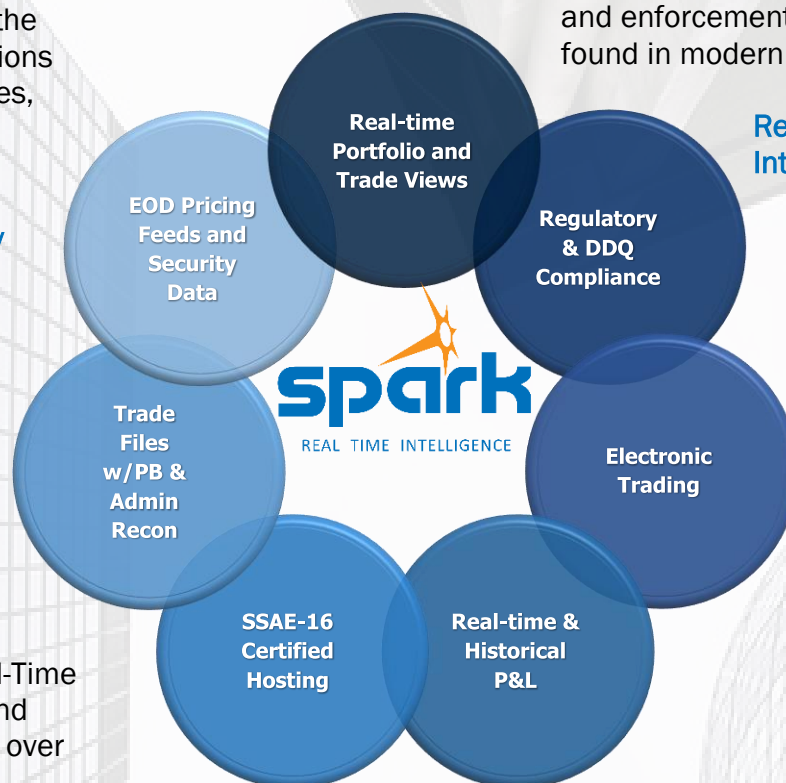

Real-Time Reports/Dashboard Position, Performance/P&L, Trade, Risk, Cash, Recon, Accounting (limited), etc.

Electronic (FIX) Trading Real-Time Blotters with up-to-the-second information. Connections to over 300 Brokers and ECNs. Flexible and Powerful Allocations and Post Trade/STP communication of Trade Details to Brokers, Primes, Admins & Other Systems.

Products Global Equity, CFDs, Options, FX, Forwards, Futures and Vanilla FI.

Provides World-Class DDQ Infrastructure Process and Controls Supports fund workflow automation and enforcement requirements found in modern DDQs.

Regulatory and Internal Compliance Support for 30+ Portfolio and Trade Rule Types including Trading Limits, Portfolio Concentration Limits and Stress Tests. Alerts of breaches via on-screen and e-mail alerts.

Hosting Primary and DR hosting provided in two of our five certified global data centers.

Upgrade Path Spark can be directly upgraded to Athena's flagship platform: Athena Aura.
